

Introduction Letter

TO WHOM IT MAY CONCERN

The purpose of this letter is to introduce to you our company the National Lightning Safety Institute (NLSI). Our focus is Risk Management of the lightning hazard.

NLSI provides objective assistance. We apply engineering, industrial organization and science to manage risk. We consult to identify vulnerabilities. We teach to educate and to train personnel about Codes compliance. We are active in Aerospace, Communications, Defense, Mining, Observatories, Power Generation and other high value economic sectors.

NLSI has developed a template which defines lightning safety in compliance with the International Codes and Standards. Safety for People as well as Safety for Facilities & Structures are shown below:

Safety for People

Early Detection
Notification
Safe Shelter
Re-Evaluate Threat
Resume Activities
Policies/Procedures
Education/Training

Safety for Facilities & Structures

Air Terminals
Bonding
Shielding
Grounding
Surge Protection
Maintenance
Inspection/Testing

Our website provides a wealth of training materials, maps, photos, and factual details about lightning issues, written by both NLSI and other lightning experts.

Looking forward to working with you,

Kind regards,

**Richard Kithil Jr., Founder & CEO
